- **StandICT in a nutshell**
Jose Gonzalez – 10 mins
- **Spotlights on the European Commission AI Watch**
Stefano Nativi – 10 mins
- **EUOS WG4 WG-AI-LAND**
Lindsay Frost – 10 mins
- **AI from the National Standards perspective**
Karl Grün – 10 mins
- **National AI Strategy for Ireland**
Fergal Finn – 10 mins
- **Q/A Session and Conclusions**

- Innovation and technology are critical enablers to the Digital Single Market
- The current standard setting system lacks agility and focus, amplified by the challenges posed by the global marketplace
- Europe must rely on ICT standards and technical specifications to reap the benefits of broader, more interoperable digital technologies
- The Rolling Plan 2020 identifies 165 actions grouped into four thematic areas

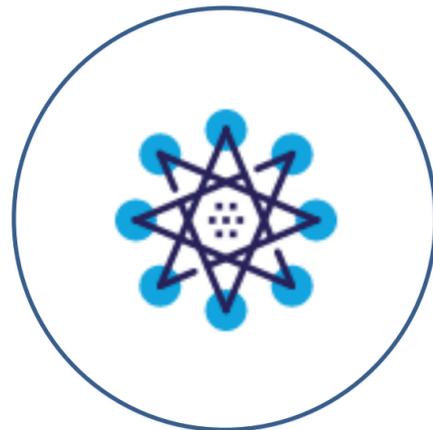

MISSION - A European Standardisation Ecosystem

The Observatory

Standards Fellowship Programme

Pan-European Coordination

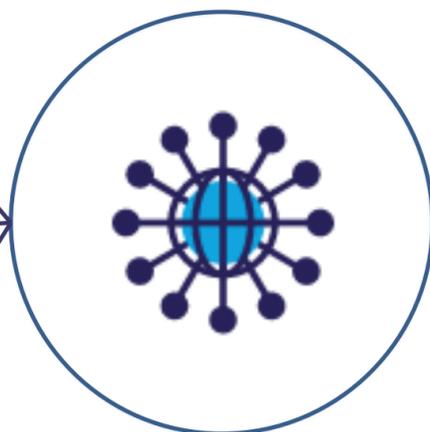

Community

MISSION - A European Standardisation Ecosystem

Monitor the status of
ICT Standards at
international level

5,000+ standards

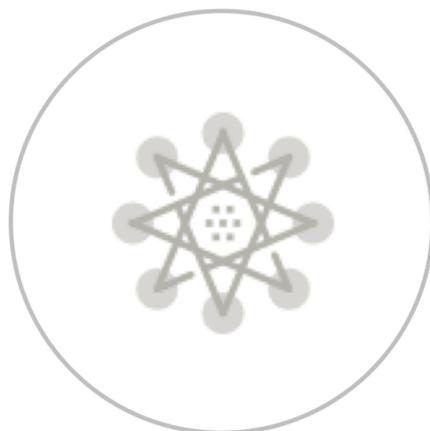

AI, 5G, IoT,
Cybersecurity, Cloud,
Blockchain... vertical
sectors

The Observatory
